CONTRAINDICATIONS:

The mini transport lifting device Dawid equipment is not a device used to transport patients over long distances. Choose the sling recommended by the doctor for the patient. When moving the patient while he is suspended from a carrier attached to the lift, do not move the base wheels through items such as raised carpet frames, door sills, or any uneven surfaces that may cause the lift to shake. If any undesirable effects occur, the patient's transport should be stopped immediately.

Length (cm)	103,5	Charging time (h)	5
Width (cm)	53,5 - 84	Front wheels diameter (cm)	7,6
Handle height (cm)	108	Rear wheels diameter (cm)	10,5
Lifting height (cm)	77-183	Maximum capacity (kg)	150
Power supply	DC 24V 8000 N	Weight (kg)	40
Charger	24V-1A	Total weight of the lift with packaging (kg)	46
Battery	DC 24V 5Ah
